I’m going to create my sofa just the way I like it.
Freedom. That’s a big word for a range of sofas.

But if you are a fan of Pippi Longstocking, or at least can remember what she’s all about, then you will accept it a matter of course. Because just like Pippi, you have the power to create your world exactly the way you like it – with the freistil 141 sofa. And we can tell you, it’s a whole lot easier than getting a horse onto the veranda!
Like this?
Or perhaps some other way?
If you value your freedom: with freistil 141 the sofa almost becomes a made-to-measure sofa. Freedom means being able to choose from a great many variants to configure the exact set-up of your dreams. We will explain on the following pages what individual decision-making steps you need to take in order to produce the different possible combinations. Until finally, the furniture evolves: a perfect match with all your requirements, your life, your style, and your back.
Let us go through the procedure, step by step. Depending whether you have chosen the basic model 1 (off the floor, with legs) or basic model 2 (close to the floor), you have various options for the next step in the configuration of your sofa. Here is a first overview of your choices:

**Basic model 1: off the floor (with legs)**

1. Basic model 1
2. Side element variants
3. Leg variants
4. Seat height (43 and 46 cm)
5. Seat depth (55 and 59 cm)
6. Sitting comfort (Lounge and Classic)
7. Individual sofas
8. Modular elements

**Basic model 2: close to the floor**

1. Basic model 2
2. Modular elements
3. Individual sofas
4. Seat height (43 and 46 cm)
5. Seat depth (55 and 59 cm)
6. Sitting comfort (Lounge and Classic)
7. Individual sofas
8. Modular elements
The basic models: Raised up, or with its feet on the ground?

If in the first step you have chosen basic model 1, then steps 2 + 3 are to choose the details of the side elements and legs. These will have a significant influence on the look of your sofa.

Basic model 1: off the floor, with legs

With basic model 2 the body of the sofa goes right down almost to the floor. This completely changes the look of freistil 141. If this is the model you prefer, you can jump straight to step 4.

Basic model 2: close to the floor
2 Side element variants

3 Leg variants

Narrow side element with legs (ST-S-FU)

Tubular legs in matt chrome optics (standard legs)

Seat height: small difference – major impact.

For even greater sitting comfort, as one of our accessories (freistil 198) we offer an optional detachable headrest which makes sitting upright wonderfully comfortable.

Sometimes 3 cm can make a world of difference – especially when you are talking about sitting correctly. You can choose between two different seat heights (43 or 46 cm). The seat heights are governed by the height of the legs. In the case of basic model 1 the seat height has to be specified when ordering, but in basic model 2 the seat height can be adjusted by means of an adapter included in the delivery.
The total depth of the sofa measures 88 cm, regardless of the different seat depths. The difference in seat depth is governed by the depth of the backrest.

Seat height and depth are mutually dependent on body size.

Our rule of thumb:
// ergonomic upright sitting: regular seat depth and high seat height.
// relaxed lounging and lying down: extra deep seat depth and low seat height.

Please note that the actual seat depth and seat height may vary due to the varying elasticity of the cover materials and the different structures of the upholstery (see page 22).
Individual sitting comfort:
As you make your bed, so you must lie on it

Classic sitting comfort is designed for those who like sitting on firm upholstery. The upholstery is relatively firm and therefore provides good support to the body in its sitting position. All in all, the Classic sitting comfort sofa has rather a rectilinear look.

Lounge sitting comfort gives you a soft sitting experience, thanks to its additional padding. This is the best choice for people who prefer to snuggle down into their sofa. The Lounge sitting comfort sofa has a rather soft, "cushiony", rippling look.
